

## HOW DOES IT WORK ?

Freelap® timing system is based on the emission and detection of electromagnetic fields and consists mainly of three elements:

### CHIP

Worn by the athlete, it measures time intervals between each transmitter.

### TRANSMITTERS

Placed along the course, they are coded (START, LAP or FINISH) and emit electromagnetic fields.

### MYFREELAP APP

Upon crossing the FINISH transmitter, the timing data is instantly transmitted via Bluetooth and saved on your mobile device via the MyFreelap app. Data can also be checked and exported on a computer via your web account on [app.freelap.com](http://app.freelap.com).

## 01. ACTIVATE & CLIP YOUR FXCHIP BLE

Battery life: 100 h on use  
Charging time: 5 h

Charge your FxChip BLE: Connect the charger to its USB C cable. **Slide the chip onto the charger.** You can charge up to 6 chips at the same time (or 4 with clips).

**Activate your FxChip BLE:** Place it vertically and shake it horizontally. A green led confirms that the device is awake.

The FxChip BLE automatically turns off after 30 minutes without crossing a Freelap transmitter.

Clip the FxChip BLE to the player's short or to the FxBelt. The chip must imperatively be **centered in the alignment of the navel**, positioned vertically.

## 02. TURN ON & PLACE YOUR TRANSMITTERS

- Turn on the transmitters: press the Power button for 1s.
- Make short presses on the button to **select the desired code:** START / LAP (intermediate) / FINISH. Each press of the button switches it to the next code.

### Tx Pro Team

Clip the Tx Pro Team to a pole or a tripod, and place it on the start line.

- Adjust the height of the Tx Pro Team: **place it at approximately the same height as the player's transponder (navel).**
- The arrow on the device must point in the direction the player is running to.**

### Tx Junior Pro

Place the Tx Junior Pro on the ground, at the edge of the track, **less than 1.5m from the player's trajectory, and 80cm after the desired distance** (except for flying start using a Tx Junior Pro as START transmitter).

**⚠ Transmitters must be minimum 0.7 second (10m) apart. Maximum 11 transmitters on your trajectory.**

## Example: Timing 40m (10m +30m)

**Tx Pro Team**  
code START

**Tx Junior Pro**  
code LAP

**Tx Junior Pro**  
code FINISH

To ensure the perfect reception of the data, **place your mobile device:**

- From 10m to 50m maximum after the FINISH transmitter
- At a height of 1 meter off the ground

- If you use a Relay Coach BLE, place it at 10m after the FINISH transmitter, and at a height of approximately 1m from the ground.
- Take the start 50cm (approx. 2 feet) before the Tx Pro Team.
- Make sure the player always passes within 1.5m maximum of the Tx Junior Pro transmitters.

## FIND MORE CONFIGURATIONS

Find all the soccer configurations (sprint & agility tests) on the library of preset Exercises on MyFreelap app, or watch our tutorial videos on the Freelap Youtube channel.

### 03. CREATE YOUR WORKOUT USING MYFREELAP

- ▶ Download MyFreelap app on your mobile device and create your MyFreelap account.

From the Dashboard:

- ▶ - Select a preset Exercise, read the tutorial, and set up your Workout according to your needs.
- ▶ - OR click on the "Quick Timing" button to start quickly with minimal features.
- ▶ Press "Start". **You are ready to receive timing data !**

MyFreelap guide

DOWNLOAD THE LATEST TIME:

**Your latest time is stored into your chip's memory.**

If you didn't receive it on MyFreelap app:

Start a Workout on MyFreelap app and shake your chip.

 **The latest time will be lost when the chip turns off, and when you charge the device.**

### INFORMATION

- **Batteries:** FxChip BLE= LiPo 3.7V 80mA rechargeable battery; Tx Pro Team= 3.7V 1Ah LiPo rechargeable battery; Tx Junior Pro= 3.7V 2Ah LiPo rechargeable battery.
- **Warranty:** Freelap® warrants its products to be free from defects in materials or workmanship for a period of two years after original purchase.
- **After sales service and contact:** If you have any questions or if you need assistance with your Freelap® devices, please contact your dealer. [www.freelap.com/freelap-contact](http://www.freelap.com/freelap-contact)
- **Compliances:** Freelap® wireless electronic components are in compliance with the requirements of Directive 2014/53/EU: [www.freelap.com/compliance](http://www.freelap.com/compliance)
- **Safety and discharge of responsibility:** To safely install and use your product, read the product user manual online at: [www.freelap.com/support](http://www.freelap.com/support). Full text of Safety and discharge of responsibility: [www.freelap.com/safety](http://www.freelap.com/safety)
